

HyperStudio® Inserting a Video

1. Create a button. Click **ok**.

2. Next, click off the button on your card screen. Another pop-up window like the one below will appear.

3. On the Actions window, click the bottom left radio button that says, "**Another program...**".

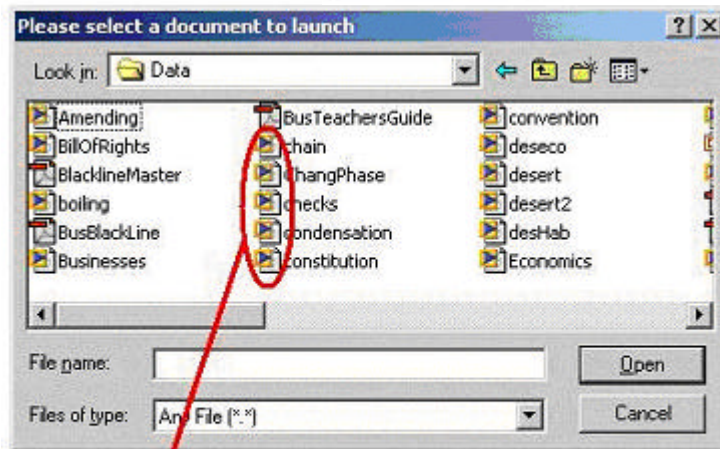

continued on p. 5...

Hyperstudio™, continued from page 4...

4. Once there, another pop-up window will appear. Here, you are prompted to find the downloaded video clip as well as the program needed to run the video.

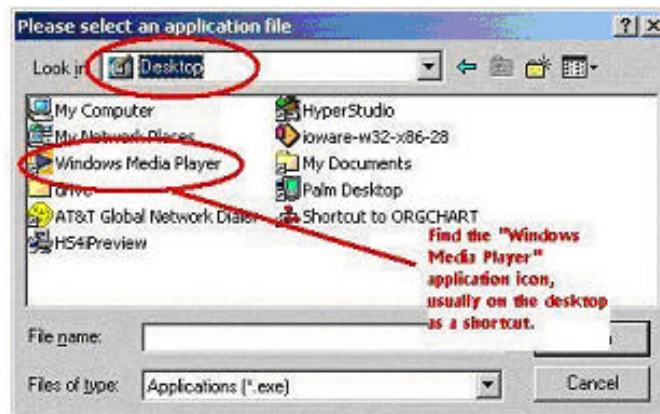

5. Find the downloaded video clip. You should see the orange and blue triangle icon. If you do not, click and scroll on **Files of type:** and make sure **Any File** is showing.

Any icon that looks like a blue and orange arrow is a Windows Media Player video clip.

6. Next, find the application **Windows Media Player** to run the video clip. You can open the shortcut, often found on the desktop, or the original application.

7. Once you have chosen a video clip and Windows Media Player, click **Done**.
